

## Edge AI Appliances

Accelerating AI-driven Edge Computing for Intelligent Video Analytics

# Edge AI Appliances Solution Overview

## TRANSPORTATION

- Simultaneous Localization and Mapping (SLAM)
- AMR/AGV
- Adaptive traffic control
- ADAS

## Rugged Edge AI Appliances

Rugged edge AI appliances are designed for mission-critical applications in challenging conditions, such as retail video analytics, factory machine vision, and traffic monitoring.

## MANUFACTURING

- MV Library & System SW
- MV Lighting
- Video Cards & CVS
- Data Ingestion & Analytics

## Edge AI Starter Kits

The AI Starter Kits aim to deliver an all-in-one platform composed of AI-accelerated hardware and application-tailored software, designed to accelerate AI deployment at the industrial edge.

Integrated with AI hardware accelerators and pre-validated with AI solution partner, Lanner industrial-grade Edge AI platforms enable solutions with specific requirements for low-latency, high-throughput, and/or power efficiency in reliable and mission-critical applications. AI-accelerated Edge computing appliances, including AI inference servers, computers, acceleration modules and AI starter kit, can build the smart city infrastructures efficiently and economically.

### SMART CITY

- Smart Locks & access control
- Vehicle Tracking
- ALPR
- video content analysis

## Edge AI Servers

Integrated with Intel Xeon CPUs, massive storage, and PCI-E expansion for GPU cards, these high-performance AI servers are designed for the most sophisticated parallel processing tasks.

### RETAIL

- Markdown Optimization
- Customer Service Routing
- Promo prioritization
- Ad Targeting

## AI Acceleration Cards

The modular AI acceleration cards feature onboard Intel, Hailo, and NVIDIA GPUs to optimize high-volume video delivery and accelerate AI-based video data analytics at the edge.

# Rugged Edge AI Appliances

Lanner provides a full range of rugged edge AI appliances designed for mission-critical applications, such as video analytics, machine vision, and traffic monitoring. With a unique ruggedized design required for different industries, Lanner's deep learning inference AI platforms feature AI-optimized processing, wide operating temperature range, LTE/5G connectivity, and a rich I/O interface.

High-Performance Processor

Compact Design

Rich IO Connection

M.2 / PCIe Expansion

Wide Operating Temperature

AI Acceleration

Fanless Design

5G/LTE WiFi Ready

# Edge AI Starter Kits

Lanner's Edge AI Starter Kits aim to deliver an all-in-one platform composed of AI-accelerated hardware and application-tailored software to accelerate time-to-market AI deployment at the industrial edge. This comprehensive kit is designed for various applications, including vision inspection, predictive maintenance, and operator monitoring.

## NVIDIA

The NVIDIA-Certified Edge AI appliance ensures secure remote operation and accelerated workloads with the NVIDIA GPU. These Lanner Edge AI appliance has passed a rigorous testing process covering AI performance acceleration, security features, and management capabilities to validate optimal system configurations.

## Intel

Intel® Edge Insights for Industrial is an open and modular product validated software that aggregates and processes time series, image/video data at the edge to provide useful insights via edge analytics. Powered by the Intel® Distribution of OpenVINO™ toolkit, EIS accelerates development, enabling quick integrations of pre-trained models (e.g., Tensorflow, Caffe, etc.) for object recognition, classification, and facial recognition in vision-based solutions.

## Hailo

The Hailo-8™ AI processor, featuring up to 26 tera-operations per second (TOPS), significantly outperforms all other edge processors. Its area and power efficiency are leaps and bounds ahead of other leading solutions by a considerable order of magnitude, reaching up to 3 TOPS/W (tera-operations per second per watt).

# Edge AI Servers

Lanner offers server-grade Edge AI servers with multi-core processing, integrated BIOS security, AI acceleration, and scalability. These high-performance servers are integrated with Intel Xeon CPUs, massive storage, and PCI-E expansion for AI acceleration. They are designed to meet the parallel processing power required in the most sophisticated AI machine vision and deep learning applications. With their robust features, Lanner's Edge AI servers provide a reliable and powerful platform for handling complex AI workloads at the edge.

## Protecting Critical Infrastructure Using Edge AI Platform

An Edge AI innovator in the U.S. approached Lanner, seeking to establish cooperation by using their AI-enhanced software to work seamlessly with Lanner's network edge servers.

# AI Acceleration Card

## The most cost-efficient PCIe accelerator card on the market

Lanner's Falcon PCIe AI Acceleration Cards provide an easily deployable solution for engineers looking to offload CPU loading for low-latency deep learning inference. With high-density AI processors, the Falcon accommodates 1~6 Hailo-8™ AI processors, offering a modular Edge AI solution with high processing capabilities and power efficiency.

The Falcon AI Accelerator Cards enable legacy devices, such as NVRs, Edge AI boxes, Industrial PCs, and robots, to run video-intensive, mission-critical Edge AI applications through a standard PCIe interface. These applications include video analytics, traffic management, access control, and beyond.

## Specifications

### AI Performance

Up To 156 TOPs 8000 FPS Of ResNet-50, 1300 FPS Of YOLOv5m

### AI Processors

1/2/4/5/6 Hailo-8™ AI Processors with Hailo Patented Structure Defined Dataflow Architecture

### AI Frameworks Support

Hailo AI Dataflow Compiler With Profiler And Emulator Supports TensorFlow, ONNX And PyTorch Frameworks

### PCIexpress Interface

PCI Express x16 Compliant With PCI Express Specification v3.0

### System Compatibility

Intel x86 or ARM Devices, Linux OS e.g., Ubuntu, Yocto Lanner Network and Edge AI Appliances

### Power Consumption

Typical: 35W

### Temperature

Operating: 0~70°C (Commercial Grade)  
-40~85°C (Industrial Grade)  
Storage: -40~85°C

### Humidity

5% - 90% RH, Non-condensing

### Dimension

Standard PCIe Single Slot Form-factor  
167.65mm x 111.15mm Without Bracket

### Certifications

CE Class A, FCC Class A

## Supported Devices

- NVRs & Edge AI Boxes
- Industrial Gateways & PCs
- Industrial Robots

## ■ Feature Highlights

**HAILO**  
Empowering Intelligence

**High Processing Power**  
Up to 156 TOPS  
8000FPS of ResNet-50

**High Efficiency**  
Typical Power Consumption 35W

**Cost-effective**  
Lowest TOPs/\$

**Advanced AI Applications**  
Supports state-of-the-art  
NN model in high resolution

**Various DL Architectures**  
Hailo Model Zoo  
Hailo TAPAAS AI Applications

**Ease of HW & SW integration**  
Hailo AI Dataflow Compiler  
Standard PCIe single slot form-factor

## ■ Hailo AI Software Suite

Lanner Falcon AI Acceleration Cards are accompanied by a comprehensive AI software suite that enables the compilation of deep learning models and the implementation of AI applications in production environments. The model build environment seamlessly integrates with common ML frameworks, allowing smooth and easy integration into existing development ecosystems. This software suite provides a powerful toolset for developers to efficiently utilize the AI capabilities of the Falcon AI Acceleration Cards in their projects.

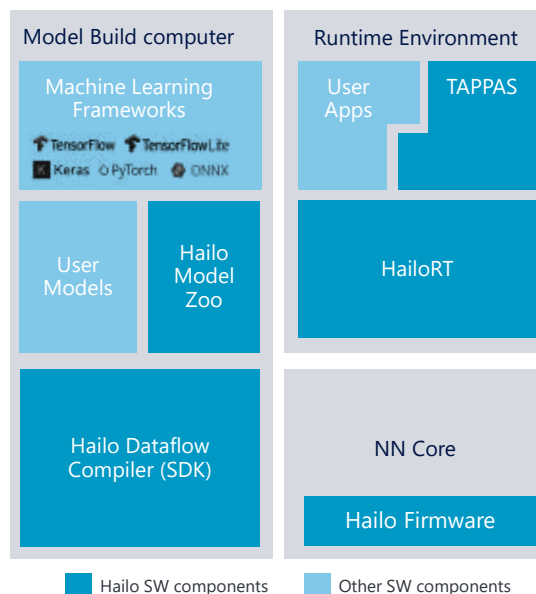

### Comprehensive AI Software Suite

#### Build Environment

Seamless integration with existing deep learning frameworks

Large variety of ~100 state-of-the-art and common free models

Maximizing AI compute performance by efficient utilization of NN core resources

#### Runtime Environment

Application examples, implementing pipeline elements and pre-trained AI tasks

An inference run-time library with intuitive API for optimized performance (C/C++/Python)

NN Core is part of Vision Processor or AI Accelerator
